

# ENVIRO-LAWN®

alternative lawnscape mixtures

*Enviro-Lawn®,  
when less is truly more.*

- **Less watering**  
*More color*
- **Less mowing**  
*More free time*
- **Less spraying**  
*More cost savings*
- **Less fertilizing**  
*More friendly to  
the environment*

## *Enviro-Lawn, the low-care lawnscape.*

Blended from a hardy, low-growing fescue, rich-green ryegrass and nitrogen-fixing clover, this new lawn alternative from Willamette Seed eliminates the high-maintenance requirements of a conventional grass lawn while it maintains an attractive, always green, low-growing lawnscape. Sprinkled with annual and perennial flowers for extra color, Enviro-Lawn is ideal for golf course roughs and low-maintenance areas around office parks, cemeteries and parks. Enviro-Lawn establishes quickly and provides an excellent, easy-care ground cover. It requires little or no fertilization, infrequent mowing and minimal watering

	Enviro-Lawn	Regular Turf
Recommended mowing	Monthly or Less	Weekly
Recommended watering	Monthly or Less	Weekly
Fertilizing schedule	Little or None	Monthly
Contains flowers	Yes	No

Compare Enviro-Lawn to regular turf and you'll see the difference in time, money and maintenance.

even in the dry season. With maintenance costs soaring and water usage being limited, Enviro-Lawn is your ideal solution. The savings in time, effort and water will add up quickly. Talk to the grass and wildflower seed pros at Willamette Seed Company.

*Enviro-Lawn establishes quickly, requires little water and provides a low-maintenance, attractive ground cover that lasts year after year.*
