

# Bruno

## Orchardgrass Late

For Haylage and Forage

**Bruno Orchardgrass** is an excellent grazing and hay producing variety with outstanding forage yields. Mid to Late maturing dates make *Bruno* compatible for hay production with increased yields. *Bruno* responds aggressively after cutting, providing added value to subsequent cuttings. *Bruno* also exhibits outstanding cold tolerance and improved drought tolerance. It is resistant to disease including stem rust.

#### Seeding Rate:

*Pure Stands:* 15-20 lbs. per acre  
*Grass/Hay Mix:* 4-5 lbs. per acre

**Areas of Use:** *Bruno* can be used as a pure stand or mixed with alfalfa or other grasses and legumes. It will produce high quality forage with high yields in every cutting or grazing rotation. It is an excellent choice for interseeding into existing alfalfa stands as well. It can be successfully used for grazing, haylage, silage or green chop.

- **Late maturity**
- **Very palatable forage**
- **Excellent persistence**
- **Exceptional cold tolerance**
- **Good drought tolerance**
