

# Evergraze

## Forage Tall Fescue

For Cover Crops and Forage

**Evergraze Tall Fescue** is a new selection of forage-type Tall Fescue. It was entered into the 2006 Virginia Tech forage finals with outstanding results. Over the four years that it was in Virginia, *Evergraze* out-yielded 28 other competitive entries. It also out-yielded all commercial varieties at the University of Kentucky over a three year period. It features medium to large soft leaves that are highly palatable, persistent and winterhardy.

#### Seeding Rate:

*Straight:* 25 lbs. per acre

**Areas of Use:** *Evergraze* is well suited to situations where high forage dry matter production and persistence are the main objectives. *Evergraze* grows well in a range of soil conditions. It can be used for hay production or grazing.

- **Exceptional forage yields**
- **Highly palatable soft leaves**
- **High drought tolerance**
- **Good winterhardiness**
- **Strong persistence**

Growth Habit	Estab. Rate Days	pH Range	Dry Matter Yield	Nitrogen Required	Anerobic Soil Tol.	CP%	NDF	ADF	Endophyte Enhanced
Perennial Bunch	Fast 6-12	4.7-9.0	4-6 tons/ac	60-80 lbs/ac	Excellent	14-20	50-58	30-36	No
